PROFILE

As a recent Computer Science graduate, I'm eager to step into the professional world and turn my learning into real-world impact. I'm passionate about development, learning from mentors, and growing as a software engineer.

seeking an entry-level software development position to apply problem-solving and coding skills.

PROJECT EXPERIENCE

Amar_Tk_banking(java, java Gui)

Amar Taka Banking is a java project developed for any kind of banking usage. In this project users can create an account by using signup and login to the account. User can withdraw money, transfer money to another user account and also can deposit money. The whole project used Graphical User Interface to show the interface.

This was made for my university project in OOP with java course.

RealTime_Chat_Application (Nodejs, MongoDB, RESTAPI)

Realtime_Chat_application is used for connect and communicate with users each other. Chats and users details save in MongoDB for database management. RESTAPI for crud operations.

Cricket App with Real-Time Stats & Leaderboards

(HTML5, CSS3, JavaScript (ES6+), RESTful APIs, Google Maps, Figma)

Developed a fantasy cricket mobile app allowing users to build teams, track live match scores, and compete on dynamic leaderboards.

Integrated real-time match data using third-party cricket APIs and Firebase for live updates and user sync.

SKILLS

Programming Languages - Java, Python, C++, C#, JavaScript

Web-Tech Skills - Node.js, Express.js, React.js, Tailwind CSS, HTML5, CSS

Database Management - MongoDB, MySQL

Tools - VS code, Github, Docker, Google Colab
